

AT VAUGHAN MILLS,  
TRENDS COME  
AND GO, BUT  
BEING "GREEN"  
NEVER GOES  
OUT OF STYLE.  
WITHIN OUR **LEAN &  
GREEN PHILOSOPHY,**

VAUGHAN MILLS IS TAKING MORE STEPS  
THAN EVER TO REDUCE OUR FOOTPRINT  
AND PROTECT OUR ENVIRONMENT.

Through a partnership with Bullfrog Power, Vaughan Mills is provided with 100% green and carbon-free electricity for 50% of the usage in the common areas of the shopping centre.

Bullfrog's power comes from clean, emissions-free wind and environmentally low-impact hydro generators right here in Ontario.

The decision to choose clean, green power helps support the development of new renewable generation in Ontario, which is good for our communities and future generations. Vaughan Mills is committed to reducing our ecological footprint and we know that our tenants and shoppers also support these responsible business practices. Ivanhoé Cambridge, which owns Vaughan Mills, is one of the largest commercial purchasers of green power in Ontario and is pleased to be partnered with Bullfrog Power - a leading provider of 100% green electricity.

### diversion program

Vaughan Mills' innovative and effective waste and recycling program diverts cardboard, paper, cans, glass, plastic bottles, wood skids, and grease from ending up in a landfill. Enhanced 3-stream recycling units can be found in each of our six neighbourhoods. Blue boxes, ongoing training, and signage help our retailers to do their part too.

### e-waste return & recycle

The goal of this program is to divert as many phones and accessories possible from Canadian landfills to ensure that the hazardous components of mobile phones are disposed in a responsible manner. Return and Recycle locations include: TELUS Mobility, Best Buy Mobile, and Rogers Wireless.

### consumption reduction system

Vaughan Mills takes pride in being part of the enerShift Demand Response Program, which applies a number of initiatives to reduce our electricity consumption on a short term basis, in response to the grid system reliability and consumption concerns.

### computerized irrigation system

Vaughan Mills employs a highly advanced and sensitive weather detection system to ensure over watering and water wastage from our gardens and landscaping does not occur.

## DO YOU KNOW

- vaughan mills reduces its emissions footprint by 700 tonnes of CO2 each year by purchasing green energy.
- vaughan mills recycles close to 750 metric tonnes each year.

# SMART PARKING

Vaughan Mills and Smart Commute are proud to present this sustainable transportation initiative.

To promote smarter commuting and greener efforts, each of our six main entrances offer two prime parking spaces dedicated to smart shoppers.

Vaughan Mills is rewarding the following customers with preferred Smart Parking spaces:

CARPOOL ZONE MEMBER
